

ECO BOX, Refinement system

The tertiary treatment system Eco Box allows the reuse of waters already treated by meaning of suitable treatment systems (activated sludge etc.)

The stages of the process are the following:

- Accumulation of purified effluent;
- Disinfection with a dose of sodium hypochlorite;
- Filtration under pressure through a filter based on active sand and carbon.

Reference	Height H (cm)	Power (Kw)	L (cm)	Item	Users (E.I.)
10101	H= 108 / W= 100	1	144	RAD1 220V	until 50
10102	H= 145 / W= 137	1	220	RAD2 380V	51-100
10103	H= 145 / W= 137	1	220	RAD3 380V	101-150
10104	H= 180 / W= 174	1	215	RAD4 380V	151-200
