

Formwork with handle PVC

Light duty traffic areas such as garage fronts, private driveways, parkings, pedestrian areas: to use as an alternative to the normal cover for catch basin when the surface appearance has to be kept unaltered.

Material: PVC.

The cover's cavity has to be filled with the proper material (as shown in the pictures).

Once installed, it can be easily lifted off by the handle.

Durability: PVC specifications and structure design give this product a great resistance against atmospheric agents and ageing, and ensure dimensional stability in time.

Benefits:

- handle tested to resist (certified traction resistance of 220 kg)
- handle easily extractable (handle fixed with screws on the bottom of the formwork)
- manageable and practical
- handle fixed with screws on the bottom of the formwork so that it can be easily dismantled for cleaning
- iron mesh can be placed inside to improve load resistance
- designed to support heavy loads
- thicker section to avoid lateral bendings
- resistant to acids and atmospheric agents
- certified load resistance (more than 203 kn = 20,3t). Test have been carried out by Istituto Giordano.
