

Subject: REACH REGULATION UPDATE

Dear Customer,

As a manufacturer of items for conveying, tapping and measuring fluid flows, REACH regulation requires us to inform you about the presence in our products of the following substances:

- CPVC articles contain a chemical called named as DOTE (CAS number: 15571-58-1). DOTE is one of the most efficient stabilizer for plastic materials and guarantees this product will deliver high performances during its long lifetime;
- Brass articles and gland of C300 sensor contain Lead (CAS number: 7439-92-1);
- Silicone products (e.g.: monitor keyboards and lubricants) could contain:
  - D4-Octamethylcyclotetrasiloxane (CAS number: 556-67-2)
  - D5-Decamethylcyclopentasiloxane (CAS number: 541-02-6)
  - D6-Dodecamethylcyclohexasiloxane (CAS number: 540-97-6);
- The resin used in the sensors range contains Terphenyl, hydrogenated (CAS number: 61788-32-7);
- The gel used in pH sensors contains Acrylamide (CAS number: 79-06-1);
- The accessories of valves (e.g.: micro switches, positioners, inserts, etc..) could contain:
  - lead (CAS numbers: 7439-92-1)
  - Nonylphenol, branched, ethoxylated (CAS number: 68412-54-4)
  - 1-Methyl-2-pyrrolidone (NMP) (CAS number: 872-50-4)
  - 4,4'-isopropylidenediphenol (CAS number: 80-05-7)
  - Hexahydromethylphthalic anhydride (CAS number: 25550-51-0)
  - Hexahydro-1-methylphthalic anhydride (CAS number: 48122-14-1)
  - Hexahydro-3-methylphthalic anhydride (CAS number: 57110-29-9)
  - Hexahydro-4-methylphthalic anhydride (CAS number: 19438-60-9)
  - DOTE (CAS number: 15571-58-1).

For all FIP products instruction sheets and technical literature are available in order to address to the correct procedures of handling, storage, installation, use and maintenance.

Kind Regards,

Casella, 14th July 2023

Daniel Di Tullio
