Subj: PE100 New female reduced adaptor with metal ring

Dear Colleague,

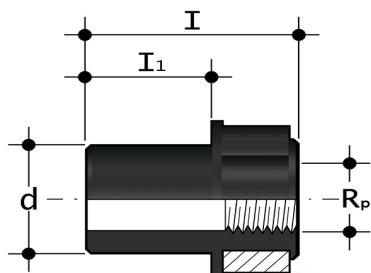

We are pleased to inform you that the new **FIP branded PE100 reduced adaptor**, with a butt welded spigot on one side and a female thread on the other one, **will be available from August**.

This item (SDR 11 d25 x 1/2" with metal reinforcement ring on female threaded end) has been developed after customers demand in order to extend our PE spigot fittings portfolio, and to provide an alternative to a current competition solution.

The **typical use** of this product is in **water treatment** and in **swimming pool** subsegments, usually in combination with injection point, for the connection to sensor (for example temperature sensor) or dosing system (Chlorine) in the PE pipelines.

Codes and dimensions are the following:

PN	SDR	d	Rp	l	l1	g	FIP PE ref. code	Mannheim PE ref. code
10	11	25	1/2"	37	16	16	DBME11025012	920278511

We would like to inform you that this reduced adaptor should be ordered from Mannheim HUB with the following German code: **920278511**.

For any further information you may need, please contact me at [glecchi@aliaxis.com](mailto:glecchi@aliaxis.com).

Best regards,

**EMEA Polyolefins Product Manager**

Giulia Lecchi
